Motor Vehicle Expenses
You can use either of two methods to determine your business use.

Please note that once you have elected a method for determining your motor vehicle expenses, you must stick with it.

Using a vehicle logbook
A logbook can be used to work out the business share of vehicle running costs. To do this, you must keep a logbook for at least three months every three years. You will need to record the distance, date and reason for the trip in the logbook. You can use the difference between the odometer readings at the start and end of the three months to work out the percentage of vehicle expenses you can claim.

An example can be found on the IRD Website, or by contacting thames@businessone.co.nz or whitianga@businessone.co.nz.

Mileage Rate Basis
Have you kept a logbook for any of your vehicles within the last three years? If so, please include copies of your logbooks with your records.

With IRD's new requirements, you will need to keep track of both your 'business' kilometers travelled as well as the 'total' kilometers travelled for the year.

If you are using this method, please let us know the details for each vehicle below:

Vehicle Description	**Odometer @ 31/10/2026**	**Business Kms**	**Total Kms**
